SUMMARY

After owning a small business for seven years, I changed my career path by getting an IT job and teaching myself front-end development. Since then, I've built both personal and commissioned projects. I'm now ready and extremely excited to take the next step in my development career by joining a team that I can grow with.

SKILLS

• Development: HTML, CSS, Javascript (ES6+), Vue framework, Vite, SQL, PWA, GitHub

• Design: Adobe Suite (Photoshop, Illustrator, After Effects, etc.), Figma, responsive design

• Personal: Organized, self-motivated, quick to learn and adapt, eager to grow

PROJECTS

Road Trip: Created with Vue, Javascript, REST APIs, HTML, and CSS.

This website takes the user's input to identify their vehicle and calculate its gas mileage. Users also enter an address and a destination (with the option to add an extra stop), and the total cost of their road trip is calculated and returned.

Jake Zaruba Photography: Created with Javascript, HTML, and CSS.

This website is a re-imagination of the website I ran my business on for years. Custom designed and built using my own photos, it's a far more creative and unique showcase of my work. This website includes a functional contact form, fullscreen slider, photo galleries, and an about page.

Minimal Weather App: Created with Javascript, REST APIs, HTML CSS, and Figma.

Available to download as a PWA, this website shows a three hour forecast with a simple display of the temperatures. It also features an option to reveal an advanced set of weather data. Every animation was custom made in Figma and CSS.

+ More listed on **my website**.

EXPERIENCE

IT PRODUCT SUPPORT, J.J. KELLER; REMOTE — MARCH 2022-CURRENT

• Provide technical support for our clients by troubleshooting our six J.J. Keller cloud-based products while communicating with our development team to improve products and performance

• Create and escalate detailed tickets for our development team to identify and fix broken components

• Assist internally with associates who are experiencing tech-related issues

OWNER, JAKE ZARUBA PHOTOGRAPHY; OMRO, WI — 2015-2022

• Photographed, edited and delivered 130+ weddings

• Meticulously planned with clients to ensure every aspect of their vision was captured on their wedding day

• Mastered various programs in media, design, file handling, and conferencing

• Ran successful ad campaigns by utilizing analytical tools to ensure the highest engagement at the lowest cost
